Welcome to the first addition of *The SOS Quarterly Corner*. We hope our new quarterly newsletter will keep you informed of safety tips, new technology in the security industry, and an idea of what we've been busy working on.

SOS SYSTEMS Spotlight Project

SOS recently completed the security installations at the new **Spacemax Self Storage off Camp Creek Pkwy** in Atlanta GA. The Multi-million dollar facility includes a unique mix of security components, including CCTV, Access Control, Intercom, Commercial Audio, Graphics and Burglar Alarm systems.

The video surveillance system consisted of (16) Megapixel (1080P) Network cameras to secure the exterior, and (62) new 960H Super resolution cameras to secure the interior.

We also installed a new PTI access control system consisting of (2) LCD Keypads controlling sliding-glass doors, (2) keypads to open a 20' slide gate, (2) elevator keypads for floor-specific security and (4) stairwell keypads. We integrated the keypad software with the sites accounting program so that tenants who have "overdue" payments, will automatically be locked out until payments are made. This technology helps the management collect on overdue rent, and runs seamlessly in the background of their computer system.

About Spacemax:

Spacemax is the Southeast regional, self-storage division of Childress Klein properties. Spacemax prides themselves on high-end climate controlled storage with customer satisfaction in mind. Their facilities include a wide variety of storage sizes, covered unloading areas, controlled access and a broad array of security systems.

Home Safety/Security Tips

Here are some important safety tips to keep you and your family safe. Keep your family protected at all times and protect what's important to you.....

- **Replace batteries in your Smoke Detectors**
*It's that time of year again to change the batteries in your electrician-installed smoke detectors. Make sure and test them as well.
- **Arm your Alarm!**
*41% of homes with alarm systems that were burglarized did NOT have the alarm turned on. Keep in mind that most burglaries happen during the daytime when no one is home.
- **Lock your doors**
*12% of burglaries occur through an unlocked door.
- **Don't announce your vacation on your Facebook or Twitter accounts.**
*This is an open invitation for one of the 400 "friends" that you may not know to have their way with your gifts under the tree.
- **Trim your bushes**
*Burglars like hiding places, and that is often between your house and the bushes outside of it.
- **Be a Good Neighbor**
*Know your neighbors cell phone #s and let them know when something strange is happening at their house that they may not know about.
- **Photograph & Keep Serial #s of Valuables**
*This is the best way to regain the costs of stolen items from your insurance company.

SOS Product Focus

- Burglar Alarm Installation and Monitoring.
- Fire Alarm Installation, Monitoring and Inspections.
- Video Surveillance System Design, Installation and Maintenance.
- Access Control System Design, Installation, Maintenance and Management.
- Low voltage wiring: Network wiring, CATV wiring, Intercom wiring, etc.
